EMC {CODE}
THE OPEN SOURCE AND DEVELOPER ADVOCACY GROUP AT EMC².

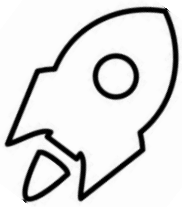

LEARN

Whether you're looking for a 101-level introduction to Docker, or an in-depth tutorial, our mission is to share knowledge and training, free and open, to the community. Sign up for our newsletter to learn more.

We always welcome new contributors, whether it's in the form of ideas, events, partnerships, code or joint projects. If you contribute, you can become part of our #DevHigh5 program and receive an exclusive swag kit, premier event access and more. Check out some of the #DevHigh5 guidelines on GitHub.

CODE

DEPLOY

There are several projects we've been heads down on, that are available for your consumption. For example, REX-Ray, which is a project that addresses data persistence with containers, or s3motion, object migration between S3-compatible storage providers. Check out all of our projects, here.
